

When
Disaster
Strikes...
Bring It On.

The TCC[®] transport solutions provide mobility to our satellite internet systems, adding rugged durability to the pinpoint accuracy of our DataStorm[®] line for on-demand internet access anywhere. Portability and dynamics give the TCC[®] solutions a strategic edge in extreme disaster environments such as hurricanes, tsunamis, floods, fires, tornadoes, etc. The TCC[®] solutions can eliminate dead communication areas in a matter of minutes via real-time data transfers, VoIP, and secure access of critical information vital for affected communities. The TCC[®] solutions can also use multiple satellite platforms for dynamically changing bandwidth packages. This helps to scale applications in whatever the current environment requires. Optional WiFi[®] support extends the range of internet access without wires and complications. Available in the .74, .98, and 1.2 meter sizes, our TCC[®] solutions are capable of being transported into critical-need situations as an immediate, effective communications system. Coupled with the DataStorm[®] D3's unique and powerful search algorithms, our TCC[®] solutions are truly first responders in the most desperate situations. When it comes to reliability you can trust, come to those who build it ... Come and see the new MotoSAT!

TCC SCOUT

The TCC[™] Scout[™] is a trailered, self-contained solution for our F or XF Internet systems, housed in a ruggedized aluminum enclosure that is mated with the trailer frame for road transport. It can also be quickly unmated and deployed via its 8 handles. The system's tires provide generous clearance while still allowing the Scout[™] to be towed by small and mid-size vehicles. The system has a sealed, lockable compartment for housing critical system components such as modem, router, VOIP, and your D3 Controller. Two weather-sealed automotive batteries (or optional generator) provide mission-critical power even in the most desperate conditions.

READY FOR A FULLY - TRANSPORTABLE INTERNET SOLUTION?

FEATURES OF THE **TCC** SCOUT:

- >> Completely self-contained for Instant, On-Demand bandwidth
- >> Supports all DataStorm™ F™ and XF™ Series systems
 - >> The DataStorm™ Supports ComTech, iDirect, HughesNet, EchoSAT, LinkStar, and others
- >> Rugged, Enclosed Aluminum Case Houses All Your Electronics

Benefits of the DataStorm **TCC** SCOUT:

- >> Optional WiFi™ and VoIP integration.
- >> Can be powered via internal batteries, optional generator or shore power.
- >> Seamless integration with a broad range of satellite platforms.
- >> Rugged construction on an aluminum framed trailer.
- >> Mobile self-contained internet satellite system in .74, .98, or 1.2 meter sizes.
