

FREEDOM M™

The Strong, Silent Type.

- Exterior dome protects your equipment.
- No need to stow or deploy the unit... just push a button and watch TV!
- Dry-Camp mode... the unit powers down after locking onto the satellite.
- Simple, one-button operation via the Freedom™ Controller.

- 15" elliptical reflector offers the highest signal strength of any domed system in the RV market today.
- Extremely low price - and an incredible 3-year warranty!
- Versatile Dip-Switch setup allows the controller to receive signal from ALL of North America's premier providers.

Dome-style systems have a few distinct advantages over open-faced dish systems, but none offers the versatility or signal strength of the MotoSAT™ Freedom™. Access DirecTV™, Dish Network™, and Bell ExpressVu™ programming with the push of a single button! And Freedom's™ ultra high-gain, 15" reflector ensures that you'll see the whole show. Choose from either classic white or a sleek jet-black!

The Freedom is the most advanced stationary automatic domed satellite television system ever designed. Building on the MotoSAT legend, the Freedom offers unprecedented access to North America's finest programming... all with the push of a single button! Whichever provider you subscribe to, the dedicated Freedom controller will "auto-acquire" satellite signals with its innovative DVB tuner technology. Freedom's 15-inch elliptical dish provides industry-dominating signal strength for the most consistent reception, and the road-ready domed housing and rustproof materials protect against weather and water. Thanks to its low price, the MotoSAT Freedom puts enterprise-grade performance and construction in the palm of your hand! Come and experience the best in mobile satellite television... You CAN Take It With You!
