<p>All of the plans above can be used in conjunction with the On Demand service when additional speed is required. We highly recommend dedicated bandwidth acquisition for video conferencing and broadcast, or any high usage networks of 15 users or more. All new subscriptions require a 12 month contract period. Dynamic IP Standard, Single Static IP is available at no extra charge at time of order. Additional IPs are available at \$50 per month for a quantity of 4. CIR is extra (see SCPC). All bandwidth is shared. Actual speeds will vary based on network load. Customer is responsible for calling in to turn off On Demand service. Monthly cost is the same for Fixed or Mobile Systems.</p> <p>Actual speeds will vary because all plans are shared except the SCPC which is not shared. Users in the 2056 Kbps up channel generally see between 700 Kbps and 1200 Kbps of actual throughput.</p> <p>Prices and specifications are subject to change.</p>	EtherSAT Fixed 1.2M Antenna & Hardware	\$3,595	\$530
